Industry 1520: Alloying; and rolling and drawing of nonferrous metals, except aluminum

/Establishments primarily engaged in the alloying of nonferrous metels (other than aluminum) from new metals. This industry clessification does not include establishments engaged principally in the recovery of nonferrous metals or nonferrous metel alloys from new or used scrap and the casting of such metels into ingots, pigs, or bars without alloying. The process of recovery of such metals is classified in Industry 1532. The industry includes also establishments primarily engaged in production of rolled, drawn, or extruded products of nonferrous metals, or nonferrous alloys (except eluminum or aluminum alloys), such as plates end sheets, rods, tubing, pipe, and wire and wire products when produced in departments of nonferrous metal rolling mills from materials rolled in the same plent. Wire drawn from purchased rods, and wire products made from purchased wire are classified in Industries 1441 and 1449, respectively./
